## Nutrient or Nuisance

Use this document to make name tags and seat tags for the activity Nutrient or Nuisance. Activity Instructions are published in the book *WOW: The Wonders of Wetlands* from Project WET ([www.projectwet.org](http://www.projectwet.org)).

Print the copy page once for every 2 activity participants (12 copies will make a set for 24 players)

Cut each page into six individual 3 x 4 inch cards.

Make a stack of each card type.

### Participant Tags Option 1 – Yarn Name Tags

- Back to back glue a minnow or a cattail card to each algae card.
- Laminate all 24 cards.
- Punch holes in the upper corners of each card.
- Lace yarn the holes to create hanging name tags

### Participant Tags Option 2 – Badge holder Name Tags

- Place each algae card into a 3 x 4 inch top loading neck hanging badge holder
- Place a minnow or a cattail card facing the opposite directions into each badge holder

### Chair Tags

- Laminate the remaining tags (soil and organic matter).
- Use masking tape to attach to chairs as explained in the activity instructions.
